TECHNOLOGIES

*****	**PHP (5+)**	primary language; many years of experience
*****	**HTML5 + CSS3**	everything about them; SASS/LESS included
*****	**JavaScript**	native scripting, JQuery, many 3rd party libs
****	**SVG**	vector graphics, both native and svg.js
*****	**Bootstrap 3**	CSS+JS framework, industrial standard
*****	**JQuery**	Basic Javascript framework
****	**JQuery UI**	User interface elements based on jQuery
*****	**MySQL**	many years of experience in optimizing
*****	**Subversion**	actively using it for my sites' version control
***	**Git**	had to use for a few projects; Tortoise client
*****	PaintShop Pro	PhotoShop-like tool, some plugins compatible
***	InkScape	vector graphics editor for SVG
****	CodeIgniter	learned in march/april 2015
****	Mobile apps	with Monaca / OnsenUI multiplatform fwk
*****	UltraEdit	primary editor, extended with my own tools
*****	ExeOutput	windows executable compiler for PHP apps

EMPLOYMENT

2015 – …   **Geonardo** – *www.geonardo.com, environmental technologies*

From the very first moment I had to learn and actively use some new frameworks and technologies here. I quickly developed a mobile app using **Monaca / OnsenUI**, built fancy visual interfaces for two new projects with strong **SVG** animation, then joined other (existing) projects written in **CodeIgniter**, equipped with Telerik's **KendoUI** library. I gained some skills with a **RESTful** API on backend, used **Git** with several advanced versioning clients (**TortoiseGit**, **SourceTree**, **GitExtensions**), also improved my jQuery/JQueryUI knowledge and adopted a few mature 3rd party plugins/tools like **CKEditor**. In the meantime I've built an intraweb system called Backstage – I'm proud to say it quickly became a company standard, increasing productivity and code quality of the IT team.

2013 – 2015 **Szállodák.hu** – *www.szallodak.hu , online travel agency*

My first task was to improve the performance of the website – now I'm the only developer and the mission is to fully rebuild the backend plus rethink the frontend for a better user experience. This project needs strong **JavaScript** with **JQuery** + **JQueryUI**, as well as some custom developed (and many 3rd party) plugins. We use **PHP/MySQL** on server side. I also involved my own portal engine called **SiteXpress** which also powers **Lovebox.hu** and many of my earlier projects.

2004 – 2013 **LB Network** – *www.lovebox.hu*

As the owner of the company and the developer in one person, I created and maintained **Lovebox.hu** which has quickly become a major dating portal in Hungary. (I actually launched it in 2002, then 2 years later I focused on it almost exclusively.) Lovebox needed all possible **optimizations** due to very high traffic and gave me a chance to take my **PHP/MySQL/JavaScript** skills to a new level. (This site features almost every usual web content class: forums, bulletin boards, chat, mailing, quick messages, photo lists and galleries, etc.)

2002 – 2004 **VIA Design Studio**

I was the head of development in a nation-wide project of creating more than 100 template-based sites for smaller cities around Hungary. Implementation was based on **Oracle Portal** and **PL/SQL**. Also I completed smaller projects using **PHP/MySQL**.

2000 – 2002 **EcoNet**

While participating in many other projects, I was the main developer of **Talalkahely.hu**, a dating portal for one of our business partners. This involved strong **MySQL** and **PHP,** as well as some **JavaScript** (early engines, IE3+) and **HTML/CSS**. This was the first project needing a lot of optimizations under heavy loads.

1996 – 2000 **MTI** – *Hungarian News Agency*

I was responsible for the user front-end development for our news database; created many applications related to this. I gained a solid knowledge of **Delphi** and the Win32 system; also worked with many terminal emulators, mainly **Reflection**, in a VAX/VMS environment.

EDUCATION

1993 – 1996 **ELTE University – Informatics** *(unfinished)*

SPECIALIZATION	IT teacher
STUDIES INCLUDE	math, sw engineering, algorithms, psychology
NOTES	I also worked here as a teacher (1994-96), preparing groups for the entrance exam

1989 – 1993 **Városmajori High School – IT class**

SPECIALIZATION	Informatics / programming (class „E")
STUDIES INCLUDE	programming (Turbo Pascal), PC architecture
NOTES	also worked here as a lecturer (1993-95)

OTHER INTERESTS / SKILLS

- **Driver's license** (class B, 1996)
  More than **800.000 km** driven since; I've been carrying various friends, business partners and hitchhikers around Europe, including Vienna, Milano, Paris, Krakow, Praha, Berlin, Leipzig, Frankfurt, Zürich and many more destinations.

- **Writing**
  Excellent writing skills in hungarian, many articles / several blogs around the web, one book about online dating, other books on the way; I use **Scrivener** for editing.

- **Music composition**
  After developing music trackers and players in the 90s for Gravis & Roland sound cards, I started using Steinberg's products, and it turned out to be a long-term choice. Currently I work with **Cubase Elements 8**. Music is somewhere between a hobby and a passion to me, I have no professional works.

- **Fashion stylist page**
  As a hobby stylist I started a women's fashion page on **Instagram** (/dk.style.n.fashion) in February 2015 and gained 4000 followers in 4 months. I use **Polyvore**'s outfit editor.
